

RM Easiteach

RM Easiteach software, has been designed for use with interactive technologies, including all brands of Interactive Whiteboards, can transform the classroom teaching and learning experience, and help you to deliver fast-paced, interactive and highly differentiated lessons.

Numonics is pleased to provide you with outstanding educational software from our partnership with RM Education! They enjoy a world wide reputation for technology excellence since the company was founded in 1973. We are certain you will derive benefit from this software which now comes standard on our Intelliboard product.

And, we are very excited about our most recent promotion: one free toolbar of your choice with every Intelliboard purchase! To gain access to your free toolbar, just attend free web training with RM Education. Go to <http://www.rmeducation.com/rmeasiteach/webinar> to view a training schedule; then email numonics@rmeducation.com with a day and time request. It's that easy! If you wish to familiarize yourself with the products prior to training, please visit <http://www.rmeducation.com/rmeasiteach/tour>. We are confident you find this offering beneficial in your teaching and enjoyable to use!

PLEASE CONTACT MELISSA AT 800—523-6716 x156 FOR PRODUCT OR PRICING INFORMATION

Key Benefits

RM Easiteach is rapidly becoming the default software application for interactive classroom use because:

- It has been designed specifically for education and whole-class teaching in very close collaboration with teachers and teaching experts
- Efficient because you can share, adapt and re-use lesson activities across your school, District and most importantly, the curriculum
- It engages and inspires students and is Ideal for encouraging effective questioning and group discussion
- It works on all brands of interactive whiteboards and other interactive technologies
- Subject-specific tools available to teach English Language Arts, Math, Science and Geography
- Ready-made lessons and content available for English Language Arts, Math, and Science, with an educational games pack suitable for use throughout the school
- Create visual and animated models easily to demonstrate concepts and processes with many multimedia resources
