Numonics Corporation Expands Product Offerings with 3M's Vikuiti™ Super Close Projection System

By Patrick Hildebrandt

Numonics Corporation has selected 3M's Vikuiti™ Super Close Projection System 700 Series to pair up with its award-winning interactive whiteboards and presentation products.

"Numonics is a trusted name when it comes to interactive whiteboard technology," said chairman & CEO Alfred Basilicato, "This relationship with 3M allows us to give our customers that same comfort and superb service for projector and projector systems. The combination of the super close (short throw) projector and the wall mount system overcomes the expensive and time-consuming process of ceiling

The partnership with 3M provides Numonics with the opportunity to add projector systems to its product line

mounting a data projector. This cost-effective alternative is an exceptional value for schools."

Under the terms of the relationship, Numonics will sell 3M's Super Close Projection System 700 Series which features 3M's patented technology, with the wall-

mounting system. The projection system is designed to be simple and cost-effective, yet flexible and powerful enough to satisfy any performance and budget requirements.

The Super Close Projection System 700 Series provides

Trainer's Corner—Summer Update

By Suzanne Fels

Summer has finally arrived and yet it's time to start planning for back to school. Whether you're a newcomer to our interactive products or just need a refresher course, you can register for any of our free web-based training sessions. You can even attend from home in

your shorts and flip-flops. All you need is a high speed internet connection and a telephone.

If you're a group interested in a Web-based teacher workshop, be sure to send your requests early to ensure the date and time is reserved: training@numonics.com

View a list of regularly scheduled sessions on our Web site at <http://numonics.webex.com/meet/webtrainer>.

Don't see a session that fits your schedule or needs? Contact us at training@numonics.com with a suggested date and time and we'll do our best to accommodate you.

Maybe you just want a quick refresher on a few particular things and don't want to attend a full training session. Visit our On Demand Self Paced Training page and watch the videos at your own pace. Click the Virtual Whiteboard link to get started.

We hope you enjoy your summer!

Numonics Partnership with 3M (from Page 1)...

basic compatibility for VGA and USB connections, with optional connectivity for computer RGB, RS232, S-Video and more. It also boasts a sharp, XGA 1024 x 768 resolution, 2000 lumens and an adjustable 60" - 80" diagonal image when using the wall mount. In addition, the projection system has a variety of wall-mounting options, or it can stand alone as a tabletop projector.

"Every interactive whiteboard requires a projection device," added Mark Colin, general manager, 3M Projection Systems Department, "The strength and history of 3M's projection technology help bring out the best of Numonics interactive technology. Having a clear image up to 80" enhances the learning experience and quickly demonstrates to customers the value of their investment in the projection

and whiteboard technology."

Numonics began integrating 3M's Vikuiti Super Close Projection System 700 Series on May 1, 2008, much to the delight of education customers. While the suggested retail price for this combination is \$2,895, the education price will be \$2,395, passing on a substantial discount to schools.

Since April 1 of last year, Numonics has been offering a free RM Easiteach Content Toolbar, a \$109 value, to all West Virginia customers. The response has been wonderful, but to encourage more teachers to take advantage of this offer, we have simplified the process.

The offer is good for any Intelliboard purchased on or after April 1, 2007 and bearing the serial number 10043500 or higher. The free Content Toolbar, available for Math, Science, English Language Arts or Geography, can be redeemed by sending an e-mail to Numonics Sales Associate Melissa Womer at melissaw@numonics.com

To get the most out of this software, teachers are also encouraged to enroll in the free Web training sessions offered by RM. Or they may visit RM's Web site at their leisure to learn more about how to implement these toolbars to improve their lesson plans.

Did you know that there is a new DPA II demo video on our Web site? Simply go to the "Interactive Products" section of the site and visit the DPA II page.

The Case Study Program: Calling All Schools!

By Patrick Hildebrandt

Hello, fellow educational technology enthusiasts! As you well

know, Numonics Corporation is dedicated to publicizing the wonderful and amazing experiences you, our customers and supporters, have with our products.

One such example recently came our way via Kristina Barker, a math and language arts teacher at Crestview Middle School in Crestview, Oh. Kristina stumbled onto the Numonics Intelliboard quite by accident; it was being stored in her classroom and her curiosity convinced her to try it out. The results have been anything but accidental. Kristina has noticed a marked difference in her ability to visually convey math and language concepts, aided by the use of Virtual WhiteBoard and RM Easiteach software pro-

grams. Perhaps the most amazing result, according to Kristina, is the board's effect on students with behavior problems. Use of the Intelliboard has improved their behavior and, consequently, their performance as well.

You can read this new case study, or all of our previous studies, at http://www.interactivewhiteboards.com/Default_New_Normal.aspx?287

Kristina's story may be extraordinary, but many other customers are using their Numonics products to work classroom magic. To that end, we are asking our education customers to submit product testimonials, provide anecdotal information and participate in case studies to be published on our Web site and in our newsletter!

To submit a testimonial, please e-mail me at patrickh@numonics.com. If for some reason you don't want to contact me, you can also tell your local sales representative. They'll be all too happy to hear your success story.

"The Interactive Whiteboard People"

Numonics Corporation is located in Montgomeryville, PA, just outside of Philadelphia. We have been manufacturing computer peripheral equipment for over 30 years. In 1994, the Interactive Products Division of our company was formed and we entered the presentation graphics and education markets with an innovative product designed to revolutionize interactive computer generated presentations. Numonics has won industry awards for product innovation, design engineering and computer productivity.

Numonics products are available through an international network of systems integrators, OEMs, resellers and distributors throughout the United States, North and South America, Europe, Africa and the Far East.
