INTELLISLATE™ Brings New Level of Mobility and Interactivity to the Digital Classroom

Powerful, Pen-Based Presentation Tool Gives Educators the Flexibility and Ease of Use of Today's Most Popular PDAs

MONTGOMERYVILLE, PA August 5, 2009 – [Numonics Corporation](http://www.numonics.com) today announced the release of [INTELLISLATE](#), a powerful pen-based presentation tool that uses wireless radio frequency (RF) technology to give K-12 educators the freedom to move about the classroom for a more engaging lecture approach, and the flexibility to involve multiple student groups in a dynamic discussion and interactive presentation.

Specifically with the INTELLISLATE, teachers can:

- Move freely about the classroom as they navigate a desktop computer for presentation
- Use a wireless pen for a more natural writing style and fast, digital display of content
- Dynamically present information on a wall, screen or interactive whiteboard, when connected to a data projector.
- Open a lesson plan or popular desktop application, such as Microsoft Word
- Launch an Internet browser, video or presentation, with the ease of today's smart phones and current model PDAs

Numonics Corporation CEO, Al Basilicato, comments, "Today's digital classroom promises to help teachers be more creative, effective and efficient, and to expose their students to real-world technology. A lot is asked of our teachers, including that they quickly learn and become proficient in the use of a variety of new technologies. We want to reduce the stress of adopting new technology into the teaching flow and to optimize every educator's time in the classroom, by providing easy-to-use and quick-to-learn-digital products that are built for today's wireless environment."

Basilicato continues, "We believe that the INTELLISLATE is helping to define a new mobile standard and enabling educators to truly teach without boundaries."

Notably, the INTELLISLATE comes loaded with over 7,000 resource files for teachers and is bundled with Encyclopedia Britannica's 2010 Ultimate Reference Suite, at no additional charge. The award-winning RM Easiteach educational content for Science, Mathematics, Language Arts and Geography is available as an option.

The INTELLISLATE:

- Runs on both the Windows and Mac computing platforms,
- Incorporates a robust RF technology,
- Provides a fast and straightforward installation,
- Gives the teacher total wireless control of a computer,
- Provides several easily customized “softkeys” for a single click launch of applications, multimedia presentations and other presentation tools and,
- Uses a wireless RF dongle that plugs into any USB port.

All typical mouse functions are transferred to the digital pen, enabling the teacher to roam freely as they navigate their computer. Several hardware and software upgrades are included:

- The very reliable 2.4G RF wireless communication protocol,
- An improved pen with a disposable long-life AAA battery,
- Increased resolution (2000 LPI) for greater accuracy,
- 8”x 6” live area, and
- Support for up to 50 units, operating from a single RF adapter.

The built-in Li-ion battery is rechargeable via the computer’s USB port and provides up to 16 hours of continuous use before recharging. An LCD display provides information regarding the battery life, connection indicator, ID number and status indicators. Standard Page Up/Down button controls are also incorporated into the product.

The INTELLISLATE 1.0 software is compatible with Microsoft Vista and MAC 10.4 OS or higher, and comes with a new version of Numonics’ Virtual Whiteboard software, which features simplified hyperlinking and embedding functions, as well as new drawing and manipulation tools.

“Numonics is committed to providing our education customers with innovative solutions for the classroom,” said Basilicato. “INTELLISLATE is an advanced tool that gives teachers the power of the most advanced presentation technology combined with the freedom and flexibility of a portable device.”

The INTELLISLATE is the newest addition to the INTELLI-brand line of interactive, pen-centric digital presentation tools. INTELLISLATE is competitively priced at \$399, has a one-year warranty, and is available for shipping immediately.

About Numonics Corporation

Numonics Corporation is an award-winning technology pioneer in pen-based digital presentation solutions. The company is certified ISO 9001, backed by 40 years of innovation, design, development and manufacturing experience. Numonics introduced the first pen-centric interactive whiteboard in 1994 and led the way in quick learn, durable alternatives to touch board technology. Numonics’ products are available through an international network of systems integrators, OEMs, and resellers.
