### INTELLITRAC™ Rail System creates flexibility in classrooms with easy access to both Interactive Whiteboards and Chalk and Dry Erase Boards

MONTGOMERYVILLE, PA June 30, 2010 – [Numonics Corporation](http://www.numonics.com) today announced the release of the [Intellitrac](http://www.numonics.com)™ Rail system, a wall mounted rail system designed to hold any large format interactive whiteboard and easily slide it horizontally to gain access to a fixed chalk or dry erase marker board on the wall behind it.

“The Intellitrac rail system will accommodate all popular size and model interactive whiteboards including Smart, Promethean, Polyvision, Hitachi, Interwrite and Numonics. It utilizes a secure and durable dual-track system with rails that attach above and below an existing fixed classroom board. The standard product is available in both 12 and 16 foot lengths and there are extenders available for larger installations.

“Schools are mostly wall mounting interactive whiteboards over fixed dry erase or chalk boards in the classroom. Unfortunately, the teacher loses access to the fixed boards in the classroom creating a problem when teaching in a traditional way without using the interactive board. Intellitrac solves that problem,” according to Alfred N. Basilicato, President and CEO of Numonics. Tom Harwick, Numonics Corporation Sales Manager, comments, “Now mounting an interactive whiteboard over an existing chalk or dry erase board with access to the fixed board is easy and affordable giving teachers greater flexibility in lesson presentation.” “We designed Intellitrac so it can be installed easily by a school employee with a few simple tools and the built-in stops make it safe for sliding back and forth without worry,” stated Steve Hildebrandt, Numonics Customer Support Manager.

“Numonics is committed to providing our education customers with innovative technology solutions for the classroom that are both cost effective and easy to use,” said Basilicato. The Intellitrac Rail system is the latest addition to the INTELLI-brand line of interactive, pen-centric digital presentation tools and it is competitively priced at under \$500, has a one-year warranty, and is available for shipping immediately.

#### About Numonics Corporation

Numonics Corporation is an award-winning technology pioneer in pen-based digital presentation solutions. The company is certified ISO 9001, backed by 40 years of innovation, design, development and manufacturing experience. Numonics introduced the first pen-centric interactive whiteboard in 1994 and led the way in quick to learn, durable alternatives to touch board technology. Numonics’ products are available through an international network of systems integrators, OEMs, and resellers.
