Numonics Corporation Announces INTELLIBOARD® DUAL PEN Interactive Whiteboard

October 1, 2010, Montgomeryville, PA– Teachers frequently ask two students to write simultaneously on the classroom whiteboard for math and science lessons. Now they can accomplish the same task with the Numonics INTELLIBOARD interactive whiteboard. “Numonics introduced the world’s first interactive whiteboard utilizing pen based technology in 1994 and contributed to the revolution that has taken place in classrooms across the world”, according to Alfred N. Basilicato, President & CEO. “Adding the dual pen function to our award winning interactive whiteboard is a further indication of our commitment to making our products relevant in the digital classroom. Our robust patented electromagnetic design gives us the confidence to offer the industry’s only limited lifetime warranty for a large format interactive whiteboard,” Basilicato continued.

All INTELLIBOARD 77 inch units will ship with “dual pen capable” electronics effective October 15th at no additional cost. If a school would like to utilize the dual pen capability they need to purchase a 2nd electronic pen for \$79.99. “The second pen operates on a different frequency and it will be a different color to differentiate the pens,” stated Tom Harwick, Numonics Sales Manager. Existing Intelliboard users will have an opportunity to upgrade their electronics to have the dual pen capability. “Dual pen capable upgrade kits for existing INTELLIBOARDS will be released on November 1st,” according to Steve Hildebrandt, Numonics Technical Support Manager. “An upgrade kit will be available on the Numonics website with complete easy to follow instructions for accomplishing this simple upgrade in the field,” Hildebrandt added.

About Numonics Corporation

Numonics Corporation is an award-winning technology pioneer in pen-based digital presentation solutions. The company is certified ISO 9001, backed by 40 years of innovation, design, development and manufacturing experience.
