### **PORTABLE MULTIMEDIA PRESENTATIONS POSSIBLE WITH IPM 500 - TRAVEL MASTER (TM)**

**June 13, 2001, InfoComm, Las Vegas, NV** - Presenting on the road is now easy and cost effective with IPM 500 - Travel Master (TM), introduced today by the Interactive Products Division of Numonics Corporation. Digital or interactive whiteboards have become popular because they add an interactive dimension to meetings, improving audience attention and group dynamics. Presenting on the road is difficult because of all the equipment needed at a meeting site. Mobile presenters are less inclined to use large-sized interactive whiteboards because the boards are expensive and awkward. Enter the IPM 500 - Travel Master (TM)!

The IPM 500 TM is a lightweight (only 16.5lbs), 30 x 41½ inch version of the award-winning full-size Interactive Presentation Manager, IPM 2000, featuring the exclusive "Softkey Editor" and "Virtual WhiteBoard" software. It is the perfect tabletop presentation device for small group gatherings where impact and group interaction are important. The convenient stand, which is a standard component that attaches easily, combined with the large 47" diagonal view area, makes the IPM 500 TM perfect for mobile presenters.

"The IPM 500 TM is the portable presentation solution we have been waiting for," said Eric Gimbal of Sales and Marketing Integration Inc. of Ambler, Pennsylvania. "Our computer generated presentations can now come to life by easily integrating multimedia for small groups and engaging audiences with this superb interactive whiteboard product."

One of the standard features of IPM 500 TM is the twenty user definable Softkeys located on both sides of the board. Touching the Softkeys with the electronic pen instantly activates preselected programs. You can launch video, audio, graphics/text and animation software.

"Traveling and presenting for a living has just been made a lot easier because of the lightweight and durable IPM 500 TM," according to David Lee Pearce, Large Format Computing of San Francisco, California. "Not only does the IPM 500 TM fit in the back seat of my car, but I don't have to worry about it breaking if it gets jostled during the trip. This product is tough and it will take the abuse required for a traveling presenter. You can also write on the surface with a dry erase marker."

“The patented electromagnetic design is the most robust technology today, offering both durability and reliability for a variety of harsh environments,” stated Alfred N. Basilicato, President, Numonics Corporation. “Our new three year warranty signifies our confidence in the IPM 500 TM with the understanding that it will log many miles in some uncomfortable places.”

See the exciting new product introduction of IPM 500 TM by visiting the Interactive Products Division - Numonics booth #21133 at InfoComm 2001, Las Vegas, NV.

Numonics Corporation is an ISO 9001 certified company with 30 years of design, development and manufacturing experience and is considered a technology innovator for collaborative computer devices.
