Intelliboard™ 77 – The latest innovation in digital interactive whiteboard technology combined with educational content software is introduced by Numonics Corporation.

INFOCOMM, ORLANDO, FLA., June 1, 2006 – The new Intelliboard interactive whiteboard establishes a new standard of excellence in education by combining comprehensive educational software with the most reliable and durable electromagnetic digital technology .

“The Intelliboard product line represents an innovative blend of hardware durability, software flexibility and style designed to convert any classroom into an exciting interactive experience with information and multimedia entertainment that will captivate students,” says Alfred N. Basilicato, Chairman and CEO of Numonics. “Offering the industry’s only limited lifetime warranty with product registration makes the Intelliboard the most cost effective classroom solution available.”

Intelliboard features the accurate and precise electromagnetic technology that is the hallmark of Numonics interactive whiteboards. All computer controls are transferred to the multimedia pen, effectively becoming a computer mouse in the hands of a teacher. The multimedia pen is a natural writing device that features left and right mouse click functions, enabling the teacher to navigate any Windows or Mac programs, visit the internet via the browser or access programs or information on a CD or DVD connected to the classroom computer.

The electromagnetic technology allows for the same durable construction that has made all Numonics interactive whiteboards “classroom tough”. The hard laminate surface makes the Intelliboard virtually immune to ordinary wear and tear, providing years of maintenance-free service. The large 77 inch diagonal screen size creates a dazzling visual classroom centerpiece guaranteed to captivate students’ attention. Both 62 inch and 47 inch diagonal sizes are offered for special learning situations or smaller room sizes. Like all Numonics products, Intelliboard is designed with the average user in mind. The design goal is to make the interactive technology easily useable, without the long and difficult learning curve. With Intelliboard, educators can focus on the teaching and not on the technology.

The Intelliboard software suite provides a powerful array of educational content software and a plethora of free internet resources, making it a comprehensive resource for teachers. Intelliboard offers the world-renowned Encyclopedia Britannica Ultimate Reference Suite DVD free of charge to teachers for use on their classroom system. In addition, a secondary level clip art library with over 2,000 images and accompanying text is bundled for creative document preparation. The easy-to-use Virtual WhiteBoard software, which is perfect for capturing notes, drawings and for lesson creation, rounds out the software suite.

“Numonics has been a recognized leader in developing innovative technology for the classroom since introducing the first pen-centric interactive device in 1994,” says Basilicato. “Intelliboard is the latest manifestation of our commitment to provide easy-to-use technology tools for teachers in the classroom. Infotainment is necessary to keep the attention of today’s students and Intelliboard is simply the best tool for delivering digital content in the classroom.”

Numonics Corporation is an ISO 9001 certified company with 30 plus years of design, development and manufacturing experience and is considered a technology innovator for interactive presentation products for education. Numonics introduced the first pen-centric interactive whiteboard in 1994 and led the way in alternatives to touch board technology. Industry awards have been won for product innovation, design engineering and computer productivity. Numonics’ products are available through an international network of systems integrators, OEMs, and resellers throughout the world. **For additional information about the new Intelliboard interactive whiteboard and the family of interactive products, contact: Patrick Hildebrandt, Marketing representative, telephone 215-362-2766, or visit www.interactivewhiteboards.com or email numonics@numonics.com.**
