Technology & Learning Magazine's 2006 Awards of Excellence **Honors Mobilepresenter BT**

MONTGOMERYVILLE, PA – October 27, 2006 – Numonics Corporation announces that the Mobilepresenter BT has been recognized by *Technology & Learning's* 2006 Awards of Excellence.

The program, now in its 24th year, honors the top educational technology products. The magazine utilizes a 35-judge panel that extensively tests all the entries and looks for the best or most innovative products available. This year, the Mobilepresenter BT is one of 55 winners, a field that includes a variety of hardware, software and Web-based learning tools.

“These award winners reflect the highest quality in education technology,” said Editor in Chief Susan McLester.

Mobilepresenter® BT is a lightweight cordless portable presentation device that replaces a mouse and gives the user total remote control of a connected computer system via Bluetooth technology. It communicates with the computer through a wireless Bluetooth interface that

plugs into any USB port on the computer, and uses a standard data projector to project all programs onto a wall, a screen or an interactive whiteboard. Mobilepresenter BT also features unique softkeys for launching applications, presentation effects and multimedia controls.

“This award is a great honor,” said Numonics Chairman & CEO Alfred N. Basilicato. “It reflects our ongoing commitment to provide easy-to-use presentation products so teachers and students can benefit by focusing on the learning and not the technology. The Mobilepresenter BT gives teachers the freedom to roam the classroom while navigating their computer and communicating with their students”.

Numonics Corporation is an ISO 9001 certified company with 30 plus years of design, development and manufacturing experience and is considered a technology innovator for interactive presentation products for education. Numonics introduced the first pen-centric interactive whiteboard in 1994 and led the way in alternatives to touch board technology. Industry awards have been won for product innovation, design engineering and computer productivity. Numonics’ products are available through an international network of systems integrators, OEMs, and resellers throughout the world. For additional information about the Numonics family of interactive products, contact: Patrick Hildebrandt, Marketing Representative, telephone 215-362-2766, or visit www.interactivewhiteboards.com or email numonics@numonics.com.
