Numonics Corporation Releases Mobilepresenter BT II

MONTGOMERYVILLE, PA –Numonics Corporation announces the release of the Mobilepresenter BT II, the latest advancement in portable Bluetooth education technology.

“Since it was introduced, the Numonics Mobilepresenter BT has helped to redefine classroom technology and has enabled educators to truly teach without boundaries,” said Numonics Chairman & CEO, Alfred Basilicato. “I am pleased to announce the improved Mobilepresenter BT II interactive small portable presentation tool including education content and a new sleek appearance.”

Like the original Mobilepresenter, the BT II replaces a mouse and gives the user total remote control of a connected computer system via Bluetooth technology. It communicates with the computer through a wireless Bluetooth interface that plugs into any USB port on the computer, and uses a standard data projector to project all programs onto a wall, a screen or an interactive whiteboard. All mouse functions are transferred to the pen, enabling the presenter or teacher to roam freely while navigating the computer. In addition,

unique Softkeys that are located across the top of the tablet allow instant access to applications, multimedia controls and various captivating Presentation Tools.

Mobilepresenter BT II features several hardware and software upgrades including the very reliable Bluetooth version 1.2 (2.4G Class II) software, an improved pen with an on/off switch to improve battery life, increased resolution (up to 1000 LPI) for greater accuracy and support for up to seven units to operate off of a single Bluetooth adapter.

The release 3.0 software includes compatibility with Microsoft Vista operating system and over 7800 resource files for teachers. There are also major enhancements to the Virtual Whiteboard (VWB) software, including simplified hyperlinking and embedding functions, as well as new drawing and manipulation tools. Additionally, the Mobilepresenter BT II comes bundled with RM Easiteach educational software providing award winning content for Science, Mathematics, Language Arts and Geography.

“Numonics is committed to continually providing our customers with innovative solutions for the classroom,” said Basilicato. “The Mobilepresenter BT II is an advanced tool that gives teachers all the power of the best presentation technology combined with the freedom and flexibility of a portable device.” The product is competitively priced at \$425, has a one year warranty and is available for shipping from stock.

Numonics Corporation is an ISO 9001 certified company with 30 plus years of design, development and manufacturing experience and is considered a technology innovator for interactive presentation products for education. Numonics introduced the first pen-centric interactive whiteboard in 1994 and led the way in alternatives to touch board technology. Industry awards have been won for product innovation, design engineering and computer productivity. Numonics’ products are available through an international network of systems integrators, OEMs, and resellers throughout the world.
