### ***Numonics Introduces PI-1900 LCD Tablet Monitor***

MONTGOMERYVILLE, Pa.—Numonics Corporation announces the release of the PI-1900, the latest advancement in LCD tablet monitors for education and industry.

“The PI-1500 has been a unique presentation tool that offered a wealth of robust features for any classroom or venue,” said Numonics Chairman & CEO, Alfred Basilicato. “With the PI-1900, we’ve improved upon the original design to give presenters even more power at their fingertips.”

The PI-1900 is a simple yet powerful interactive device that is perfect for both large and small venue presentations. When connected to a computer, the monitor becomes the desktop and the electronic pen functions as the mouse, giving presenters the ability to navigate any Windows program with speed and accuracy. The PI-1900 also features adjustable viewing and writing angles, making it flexible enough for a podium, conference table or desk. The accompanying software includes powerful Presentation Tools and Numonics’ renowned Virtual Whiteboard Software (VWB) for drawing and note-taking, and the perfect place for lesson plan development.

While the PI-1900 retains the same stellar features that distinguished the PI-1500, it boasts several important technological upgrades. It's lighter and features an increased 19" diagonal screen and an increased viewing area. The resolution has also been doubled, and now stands at 1000 lpi. In addition, the PI-1900 has larger viewing angles, ranging from 75° to 85°, and requires no external power supply.

"Numonics is dedicated to providing the best in presentation technology," said Basilicato. "The PI-1900 offers the same great features our products are known for, but in a sleeker, more dynamic package." The product is competitively priced at \$2095, has a one-year warranty and is available for shipping from stock.

### **About Numonics Corporation**

Numonics Corporation is an ISO 9001 certified company with 30 plus years of design, development and manufacturing experience and is considered a technology innovator for interactive presentation products for education. Numonics introduced the first pen-centric interactive whiteboard in 1994 and led the way in alternatives to touch board technology. Industry awards have been won for product innovation, design engineering and computer productivity. Numonics' products are available through an international network of systems integrators, OEMs, and resellers throughout the world. For additional information about the Numonics family of interactive products, contact us by telephone at 215-362-2766, by Web at [www.interactivewhiteboards.com](http://www.interactivewhiteboards.com) or by e-mail at [numonics@numonics.com](mailto:numonics@numonics.com).
