

## Creating a Cartesian Coordinate Background

Open a virtual whiteboard session. From **Format/Options** choose **Precision Graph Paper** and click **OK**.

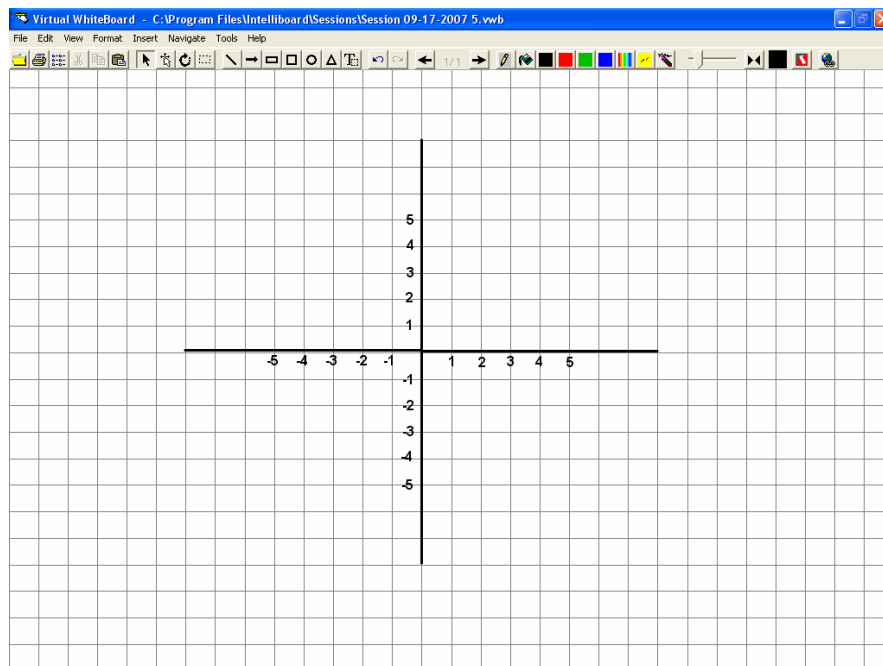

Using the **Line Tool**, draw your X and Y axes.

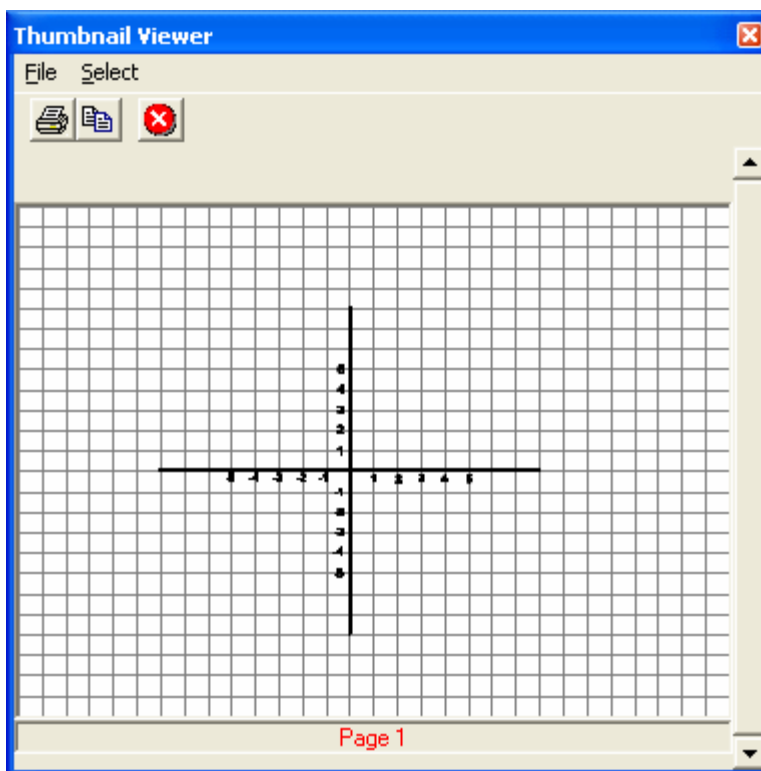

---

Enter your coordinates using either the Text Tool or writing them with the Pen Tool.

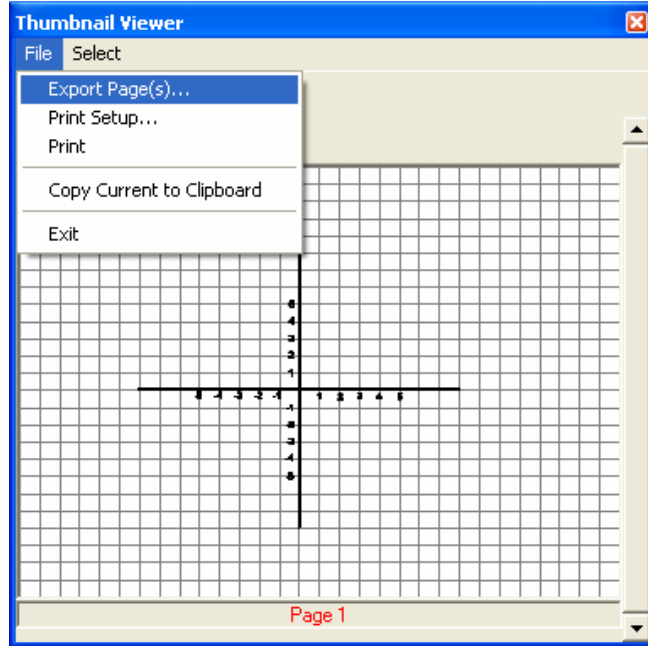

Switch to **Thumbnail View**. Right click to select your page.

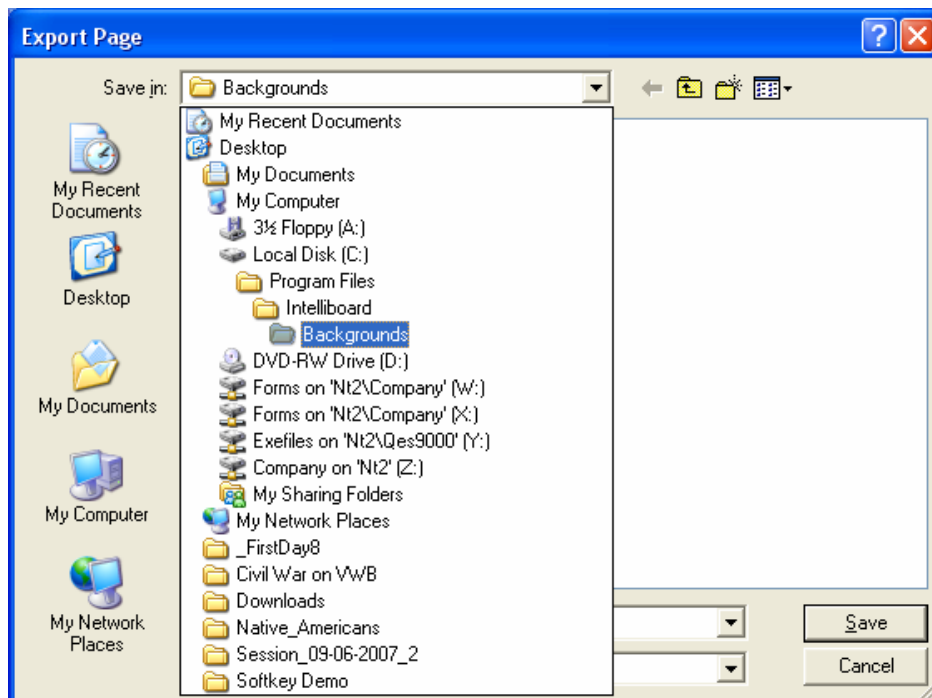

---

From the **File** drop down menu, choose **Export Page(s)**,

Give it a **File a Name** you'll remember. Browse to **C:\Program Files\Intelliboard\Backgrounds** and click **Save**.

Now, when you return to virtual whiteboard and choose **Format/Options**, you'll see your file in the drop down list and you'll be able to use it as a background any time you want.
